

Arling Lumber Receives FSC Chain-of-Custody Certification

Arling Lumber has earned its FSC Chain-of-Custody certification for wood products. We are now able to supply your FSC lumber needs for your green building projects specified under the LEED program of the U.S. Green Building Council, as well as other projects requiring FSC-certified wood.

Green building is booming in the United States. By 2013, green building is expected to represent 25 percent of all commercial and 20 percent of all residential construction, up from 2 percent in 2005.

Since its inception, the U.S. Green Building Council's **Leadership in Energy and Environmental Design (LEED)** rating system has recognized FSC as the world's only credible forest certification system.

Forest Stewardship Council (FSC) is a non-profit organization devoted to encouraging the responsible management of the world's forests. FSC sets high standards that ensure forestry is practiced in an environmentally responsible, socially beneficial and economically viable way.

Arling Lumber is proud to be a regional distributor of FSC-certified lumber to our lumber dealers throughout the Midwest.

The mark of
responsible forestry
